Professional Experience

Indocyber Global Teknologi / Placement at bank rakyat indonesia — Indonesia
Senior Sofware Engineer (L5) — Dec 2025 – current

• Led the end-to-end architecture of BRISPOT for Kurator and Briling, achieving high-level interoperability across medical, admin, and financial functions.
• Initiated and designed system architecture based on microservices principles, ensuring scalability, maintainability, and modularity
• Designed and presented System design to technical and non-technical stakeholders, detailing technology evaluations, competitive trade-offs, and cost-benefit analyses

One Indonesia / BCA Training Event — Indonesia
Mentor Java Spring Boot — Dec 2025 – Dec 2025

• Privileged to have served as a Java Spring Boot Mentor at the BCA Training Event. I had the opportunity to guide aspiring developers through the complexities of building scalable, enterprise-grade microservices.

Pertamina Bina Medika IHC / Holding company for SOE hospitals in Indonesia — Jakarta, Indonesia
Senior Software Engineer (L5) — March 2023 – Nov 2025

• Led the architecture and development of SIMRS (Hospital Information System) with seamless integration across medical, administrative, and partners
• Provided technical mentorship to 12 engineers across the hospital subholding's nationwide network, driving standardization and engineering best practices
• Standardized healthcare data exchange by implementing HL7 FHIR protocols, ensuring interoperability between hospital systems and external medical databases
• Designed and presented System design to technical and non-technical stakeholders, detailing technology evaluations, competitive trade-offs, and cost-benefit analyses
• Conducted over 5 interviews to vet engineers from interns (L1) to senior engineers (L5)

Lemonilo / Consumer good startup — Jakarta , Indonesia
Senior Software Engineer (L5) — Dec 2022 – Feb 2023

• Led a team of 3 to build a vertically integrated lead generation product, Store Locator, native to iOS and Android. Reduced Cost Per Lead by 33%, personally secured $14 million dollar contracts and opened up multi-billion dollar potential revenue for Facebook.
• Led a team of 8 people to make Facebook and Instagram MRC Viewability compliant, by building the viewability framework in iOS, Android, and web for Facebook and Instagram. Saved Facebook over $2B of potential missed revenue due to compliance issues.

GreatdayHR /Hris startup — Jakarta, Indonesia
Senior Software Engineer (L5) — Sep 2018 – May 2018

• Led a team of 3 to refactoring of legacy systems into microservices to improve maintainability, scalability, and system performance.
• Developed and maintained backend services with nestjs and golang to support core HRIS features such as attendance tracking, payroll processing, employee self-service, and performance management.

Education

Universitas Terbuka
B.Sc Information Sytem
Grade : 3,75 — Aug 2025 - Jan 2029

Projects & Achievements

Software Enigneering Mentor Coached over 30 Student From university and company to building scalable software and enterprise-grade microservice

Skills: React, Angular, Nests, Spring boot, Laravel, Django JavaScript, Typescript, Flutter, Java, Python, Golang, Php AWS, GCP, BigQuery, Datadog, Kubernetes, Docker, Ansible, Terraform, Fortinet, Networking Management, Engineering Management
